(54) Title: AN IMPROVED GOLF CLUB

(57) Abstract: This invention relates to a golf club consisting of a club head having a tapered bore formed therein extending and tapering inwardly from the base of the club head to the upper surface thereof, a socket of corresponding external shape to the bore in the club head and a shaft adapted to be inserted into a bore formed in the socket. The socket is inserted upwardly into the end of the bore in the base of the club head and due to the taper is positively retained in said bore against upward movement.
